Rapport

architecture mise en place

les choix techniques

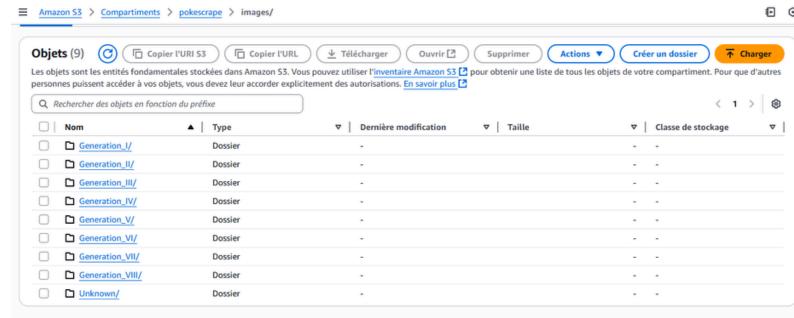

- Site source: Bulbapedia
 https://bulbapedia.bulbagarden.net/wiki/List of Pok%C3%A9mon by Nation
 al Pok%C3%A9dex number
- Scraping: différente bibliothèques, BeautifulSoup pour parser les tables HTML et extraire les URLs d'images, requests pour télécharger les image et la gestion des erreurs (retry et timeout) et pour upload dans S3 utilisation de boto3 ou les images sont préfixes par génération (image/generation1...)

Capture d'écran

Exécuter le script Python pour le scraping et le l'upoad des images dans S3 :

```
|buntu@ip-172-31-40-191:~/poke$ nano poke.py
ubuntu@ip-172-31-40-191:~/poke$ ubuntu@ip-172-31-40-191:~/poke$ nano poke.py
ıbuntu@ip-172-31-40-191:-
                              $ ubuntu@ip-172-31-40-191:~
                                                          /poke$ python3 poke.py
Found 9 generation tables
